

OBJECTIVE

Angular Development | Front-End Development | Scalable Web Solutions | Immediate Joiner

A detail-oriented Angular Developer with expertise in building responsive, dynamic, and scalable web applications. Skilled in Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, and Angular Material, with a strong focus on UI/UX best practices. Proficient in integrating REST APIs, managing state efficiently, and implementing complex form handling using Reactive Forms. Experienced in Agile methodologies, version control (Git), and CI/CD pipelines, ensuring seamless development workflows.

Familiar with Django REST Framework at a beginner level, enabling basic backend API integration for full-stack collaboration. Passionate about continuous learning and leveraging modern front-end technologies to enhance performance, maintainability, and user experience.

PROJECTS

HRMS (Human Resource Management System) of West Bengal.
is a comprehensive web-based application designed to streamline various HR-related processes for government employees. It facilitates employee data management, payroll processing, leave management, and other administrative functions.

LFPLPF Online – Leave, Payroll & Pension Fund Management System.
The LFPLPF Online (Leave, Payroll, and Pension Fund Management System) is a digital platform designed to streamline HR operations related to leave management, payroll processing, and pension fund administration. It is primarily used for government employees in West Bengal, enabling efficient handling of salary structures, pension calculations, and leave approvals.

Additional Contributions:

- E-Billing System:** Assisted in the development and enhancement of an electronic billing system to streamline invoice processing and financial transactions.
- GRIPS (Government Receipt Portal System):** Contributed to the maintenance and integration of the portal, ensuring seamless payment processing and revenue collection for government departments.
